## AVOID ACCIDENTS

The majority of accidents and injuries which occur in plants, in farms and at home or on roads, are caused by the non-observance of some simple and fundamental rules of precaution and safety. For this reason in the MAJORITY OF CASES THEY CAN BE AVOIDED: it is sufficient to foresee possible causes and to act according with the necessary precaution and care.

With any type of machine, as much as good planned or built, it is impossible to absolutely avoid risks of accidents without involving negatively some essential features for a reasonable access and an efficient operation.

Read carefully the indication and cautions of this manual contained in the SECTION "SAFETY PRECAUTIONS".

A careful and cautious operator is the best warranty against accidents.

The careful observation of a single and elementary safety precautions would be enough to avoid many serious accidents. This precaution is:

**Never attempt any cleaning, lubrication or maintenance operation when machine is moving.**

### WARNING

***Before carrying out any maintenance operation, adjustment and or repair on machines equipped with attachments, controlled hydraulically or mechanically, make sure that the attachment is lowered and safely set on the ground. If in order to get access to a machine part it is necessary to hold the attachment lifted, this should duly be supported by means that are not use to control the machine.***
