General Information

Machine Identification

Machine Identification Plate

Your machine has an identification plate **X** mounted on the Chassis as shown. The serial numbers of the machine and its major units are stamped on the plate.

The serial number of each major unit is also stamped on the unit itself. If a major unit is replaced by a new one, the serial number on the identification plate will be wrong. Either stamp the new number of the unit on the identification plate, or simply stamp out the old number. This will prevent the wrong number being quoted when replacement parts are ordered.

The machine and engine serial numbers can help identify exactly the type of equipment you have ⇒ Fig 1. (☐ 1-1).

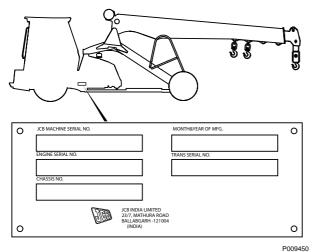

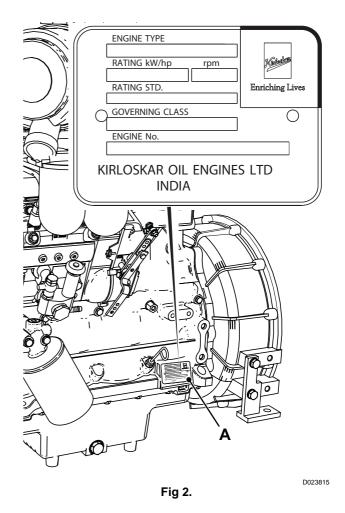

Fig 1.

Unit Identification

Engine Serial Plate

The engine serial number is stamped on a label which is fastened to the left side of the cylinder block (looking from the rear) ⇒ Fig 2. (1-1).

Transmission Axle Serial Plate

The transmission axle serial number is stamped on a plate mounted to the front face of the axle, as shown \Rightarrow *Fig 3.* (1-2).
